

TIPS FOR MEASURING YOUR QUILT

By Yvonne

- ✚ The way I prefer to measure a quilt is to drape my quilt top across the belly bar of my Handi Quilter.
 - Smooth out the quilt and measure it with a 120" tape measure.
 - Take a couple of measurements to make sure it is truly square.
 - Measure both ends and center.
 - If there is any variance, average the three measurements (ends and center).
 - Measure the quilt both horizontally and vertically.

- ✚ Another technique is to fold the quilt into quarters.
 - Measure the edges and the folded side.
 - Average the measurements and measure both directions.
