Easy automation.

Imagine finishing quilts faster, with every stitch perfectly in place. The Pro-Stitcher automation system comes fully integrated into the Infinity 28, letting you switch to automated quilting at the touch of a button. Stitch complex or edge-to-edge designs with ease, and use tools like Two-Point Rotation for borders and tricky angles—then try Pro-Stitcher Designer™ for creating or editing your own patterns. You get both precision and total creative freedom when stitching your story.

- 800+ digital designs included
- 12-inch full-color touchscreen
- Easily resize, rotate, skew, and align designs
- Fill any shape or area
- Stretch and resize a design on-screen
- Precise stitch-in-the-ditch placement
- Record and save custom designs
- Automatic border and multi-point alignment
- WiFi-enabled for easy updates and downloads

Quilt in comfort.

The Gallery3 Frame comes standard with a built-in lift system and three preset heights for effortless adjustment. Easily switch between Clear-View and Standard View, and also enjoy heights from 28" to 51" to quilt comfortably.

Designed with you in mind The Infinity 28 is built for comfort and control. Fully adjustable Comfort-Fit handlebars move into the position that feels best—even a low micro-handle setting for detailed designs. Programmable buttons let you set your favorite shortcut, and left-handed quilters can swap functions with a tap. It all comes together with bright LED lights illuminating the throat and needle area, with smart details like onscreen and manual tension controls all working together to make quilting effortless. Now you can focus on creating your next super-sized masterpiece.

1
Tie-off Stitches
One tap to secure the stitch
